

Tutorial Questions

Course : B.Tech
Course Name : Web Programming

Course Code: CST463
Year & Semester : 2nd Year, 3

Academic Year: 2025-2026

Tutorial No : 1

Module No: 1

Topic: Programs using Links and List

1. Design an HTML5 website that displays the **KTU BTech Final Year Curriculum** for **Semester 7** and **Semester 8**. Each semester will list the subjects, and each subject will have an internal link that leads to a detailed syllabus for that course. The website should be easy to navigate and provide a clear structure for the curriculum.
2. create an HTML webpage that displays the **top 10 websites** using their **thumbnail logos**. When the user clicks on a thumbnail logo, the corresponding website should open in a **new window** or **new tab**.
3. create an HTML webpage that displays the various **courses** and **programs** offered by a university using a **nested list**. The courses should be grouped under relevant programs, and the entire structure should be organized using HTML's list elements
